

**IN THE SPECIFICATION**

At page 2, line 23 to page 3, line 10, please replace that paragraph with the following:

In another aspect, the present invention provides a method of making an architectural fabric for a retractable, temporary, or permanent structure by:

- (a) providing a layer of fabric having a first surface and a second surface and comprising polytetrafluoroethylene fibers;
- (b) providing a first layer and a second layer of porous expanded polytetrafluoroethylene membrane;
- (c) providing a first layer and a second layer of ~~THV~~ a terpolymer of tetrafluoroethylene, hexafluoropropylene, and vinylidene fluoride (THV);
- (d) laminating the first layer of THV to the first layer of porous expanded polytetrafluoroethylene membrane to form a first THV/membrane composite;
- (e) laminating the first THV/membrane composite to the first surface of the fabric;
- (f) laminating the second layer of THV to the second layer of porous expanded polytetrafluoroethylene membrane to form a second THV/membrane composite; and
- (g) laminating the second THV/membrane composite to the second surface of the fabric.
